

AI at qSD

Core Values & Guiding Principles

TEACHING AND LEARNING

AI will be used to enrich learning experiences, deepen student engagement, and strengthen effective teaching practices. We will use AI as a tool to nurture curiosity, creativity, and problem-solving, while ensuring responsible use and alignment with our values.

RELATIONSHIPS AND WELL-BEING

AI should support, not replace, the professional judgement, empathy, and relationships at the heart of education. It should also contribute to the well-being of our learning community by improving experiences and fostering safe, supportive environments.

ETHICAL USE AND ACCOUNTABILITY

Decisions about AI will be guided by ethics, safety, and accountability to our learning community. We are committed to transparency, open communication, and ethical decision-making when using AI.

EQUITY AND INCLUSION

AI will be used to enhance learning while promoting equity, inclusion, accessibility, and safety. We are committed to using AI in ways that respect and honour Indigenous ways of knowing and being, ensuring every learner feels safe, valued, and supported.

COMMUNITY AND SHARED RESPONSIBILITY

Safe and ethical use of AI requires collaboration and shared ownership. Students, staff, families, and community partners all contribute to shaping how AI is used in our district.
