
PARENT/GUARDIAN INVOLVEMENT IN EDUCATION

Background

The District recognizes that the most effective education for students occurs when parents are active partners in the learning process.

The District values the needs, interests, and perspectives expressed by parents. The District supports parental involvement and encourages parents to participate in opportunities that will foster a positive school climate and enrich students' learning experiences.

School staff, and parents should work together as knowledgeable partners. Such collaborative partnerships provide an atmosphere of teamwork which, motivates, supports, and encourages children to become lifelong learners, and valuable contributors to society.

Continued parental involvement in the education of children/youth, throughout all grade levels, contributes greatly to student achievement and a positive school environment.

“Parents have the right and responsibility to participate in the process of determining the educational goals, policies, and services provided for their children. They have the primary responsibility to ensure that children are provided with the healthy, and supportive environment necessary for learning. They have a responsibility to help shape, and support the goals of the school system and to share in the tasks of educating their young.”
