Roger Focus EasySheet

## Inserting Roger Focus

- Place Roger Focus behind ear

- Place the hearing tube between your thumb and forefinger. Insert the dome deep enough into the ear canal so that the hearing tube lies flat on the your ear

- If your Roger Focus has a retention wing then press it into the bowl of the ear in order to retain the dome in the ear canal

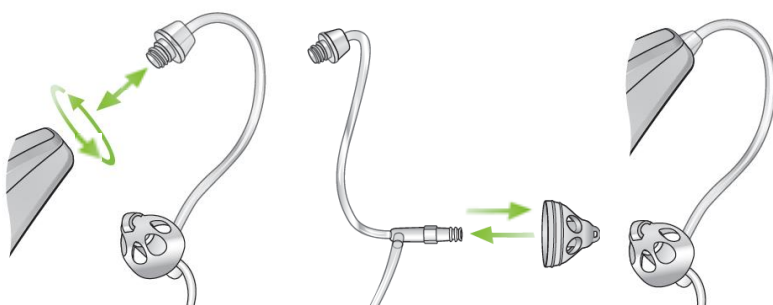

Changing the battery

- Remove tab from battery to activate then wait 1 minute

- Insert battery as shown

- Close the battery door

- Roger Focus is now on

Roger Focus Volume Control

The Volume control may be locked and not operate please consult your hearing care professional if this is the case.

- The volume increases until a double beep is heard

- After the double beep the next press puts the Roger Focus at minimum volume level where you can start increasing again

- This mid-point volume will give a long beep

Cleaning Roger Focus

- Remove the sound tube by rotating anti clockwise and remove the dome.

- Clean tube with cleaning line (will pass right through tube)

- Attach new dome and reattach tube to Focus by rotating tube in a clockwise direction
